EPGP-19 Batch Connect: Demo Documentation

Prepared by Mohammad Javed|+91-9028537552, EPGP-19 participant, for review by the EPGP Office, IIM Kozhikode.

1. Purpose

The EPGP-19 batch is large and is split into two immersion groups (Session 1: 10–16 Dec 2026, Session 2: 17–21 Dec 2026). Participants in one group may never meet those in the other. Batch Connect puts both groups on one invitation-only platform so the whole batch can connect, gel and network, with IIM Kozhikode holding full authority over how it is run.

This document describes the demo. All data in it is fictional sample data.

2. Guiding Principles

Principle	What it means
Institute-governed	IIM Kozhikode decides whether, when and how the tool is used, including every module and rule.
Invitation only	Access is by a code issued and revocable by the Admissions Office.
Consent first	Participants choose what is visible. No phone numbers or email addresses are shown.
Minimal data	Name, role, city, industry, session, and what a person offers or seeks.
Reviewed content	Career opportunities are visible to the batch only after EPGP Office approval.
Flexible	Modules can be switched on or off, changed or added before any rollout.

3. Modules in the Demo

Module	What it does
Batch atlas	Shows where the batch works, the split across sessions, seniority and industries.
Smart match	Ranks participants by what a person is looking for and can offer, flags mutual fit and cross-session connections, and suggests a study pod of five with different functions.
Career bridge	A peer-led board for roles, referrals, mentoring, projects and advisory requests. It is not placement assistance and assures no outcome. Posts go to EPGP Office review first.
Faculty lens	A live class pulse poll, an upvoted question board and a practitioner bench that helps faculty invite batchmates with real experience in a topic to share short cases.
Immersion concierge	Cab-sharing groups to campus for both sessions, and meetup RSVPs.
IIMK admin view	Invitation codes, a review queue for posts, module switches and a list of further module ideas.

4. Roles

Role	Can do
IIMK administrator (EPGP Office)	Issue and revoke invitation codes, approve or decline posts, switch modules on or off, decide on new modules.
Participant	Enter with an invitation code, control their own profile visibility, search and match, post opportunities for review, join cab groups and meetups, vote and ask questions.

Role	Can do
Faculty	View the class pulse and question board, and find practitioners by topic.

5. Data and Privacy

Shown to invited participants (with consent): name, role, city, industry, session, what the person offers or seeks.

Never shown: phone numbers, email addresses, or any employer-confidential information.

In the demo: all profiles, polls and questions are fictional. Actions taken in the demo are stored only in the viewer's own browser and are not collected.

For any real rollout: I will follow whatever data protection, consent and retention requirements IIM Kozhikode specifies, including those applicable under Indian data protection law. Where data is stored, who can access it and how long it is kept would be decided by the Institute's technical team.

6. How the Demo Is Built

The demo is a single web page that needs no installation and runs in any modern browser. It demonstrates the experience only.

A real version would need a shared data store. One option is a Google Sheet with Apps Script, which the Institute can host under its own account. Another is a platform chosen by the Institute's technical team. Authentication, hosting and data location are for the Institute to decide.

7. Proposed Rollout (Subject to IIMK Approval)

Step	Activity	Owner
1	Demo review by the EPGP Office and technical team	IIMK
2	Decisions on scope, privacy rules and hosting	IIMK

Step	Activity	Owner
3	Adjust modules and fields to the Institute's feedback	[Your Name]
4	Small invited pilot group	IIMK with [Your Name]
5	Review and decide on wider rollout to the batch	IIMK

8. Risks and Safeguards

Risk	Safeguard
Misuse of personal data	Opt-in profiles, minimal fields, no contact details shown, Institute-controlled hosting and deletion.
Unauthorised access	Invitation codes issued and revocable by Admissions.
Misleading career claims	Clear "not placement assistance" notice and EPGP Office review before posts appear.
Tool abandoned over time	Documented handover and Institute ownership of data and decisions.
Overload for participants	Optional use, light modules, no mandatory participation.

9. Questions for the EPGP Office

1. Which modules would you want to keep, change or remove?
2. What data protection and consent rules should the tool follow?
3. Where should data be hosted, and who should administer it?
4. How should invitations be issued and by whom?
5. What review process should apply to career postings?
6. Are there further modules that would help the batch connect better?

10. Next Steps

I would welcome your feedback on the demo and am glad to walk the team through it. I will change, add or remove modules according to the Institute's guidance before any rollout.
